# Certification Support

---

Stackabl product materials and performance attributes can support projects in pursuing LEED and WELL credits. They can contribute to:

## LEED:

- Energy Performance
- Recycled Material Sourcing
- Material Ingredients
- Interior Lighting Quality
- Acoustic Performance
- Innovation
- Light Pollution Reduction

## WELL:

- Light
- Sound
- Materials
- Innovation

In addition to LEED and WELL, Stackabl materials and product attributes may support credits or compliance pathways associated with programs such as Living Building Challenge, Fitwel, BREEAM, Green Globes, and project-specific ESG or embodied carbon frameworks. Applicability varies by project and certification requirements.
